

Formations Inc. - Supporting the Edmonton community and Children's Autism Services of Edmonton

In this time of giving, it's important to recognize our partners who have helped make a difference in how we serve families with autism. Formations Inc understands the specialized services that Children's Autism Services provides to our community.

The demand for autism treatment in Edmonton continues to rise. Currently, **1 in 66 children are diagnosed with autism**. As the demand grows, so do waitlists. We didn't want to turn any families away and desperately needed another location. We acquired an older building on the south side of Edmonton at 9765 54 Avenue and started the renovation process. The in-kind donation of materials we received from Formations was critical in making our second location a reality.

"We know that Formations sees the need to support children and families affected by autism and we appreciate the collaboration with our organization. It's because of companies like this that we can help families and children," says Terri Duncan, Executive Director at Children's Autism Services of Edmonton.

Formations supplied all the raw wood materials for countertops, cabinets and door frames. Madsen's Custom Cabinets offered their services to manufacture and install all the countertops and cabinets.

Tim Tattinger with Synergy Projects was the project manager for the south campus location. He says the team at Formation and Madsen's were incredibly generous. "They were so accommodating and extremely committed to the project. Formation suggested higher end solid surface countertops for longer durability. Their willingness to supply these types of materials and make changes as needed was a testament to the type of business they run," adds Tattinger.

Formations is truly making a difference in the Edmonton Community.
